Richard's Monthly Recap

Looking ahead to the month in trading

Hello Everybody!

Your Senior Mentor and Coach here! Well, that was quick month wasn't it? Probably the fastest month on record. September was great to start with but the last two weeks were very difficult to track. I'm hoping October will be less problematic.

Massive welcome to all the new guys we are very much looking forward to working with you and bringing you on in your ability to trade the markets, we've been extremely busy here working on how to improve things.

The New Year looks extremely exciting as we are working on probably our biggest upgrade in terms of service. I can't say too much just yet but trust me it's going to be epic and we will be blowing the competition out of the universe!!!

The US dollar is now on the back foot it's unclear at this stage if the US government will shut down through lack of funding but that said I've seen this before Trump did shut down the government for 34 days during his first term. Maybe this is part of his plan to kill the dollar to help him refinance who knows.

New for December will be our affiliate training program if you are interested in growing your own abilities to earn alongside your trading this will be for you look out for more info in the group that's me for now see you online RW.
